The Power of Blue.®

CP-302 MIGRunner™ comes complete in one box. See page 4 for details.

Adjustable weld stabilizer (high-low inductance) provides the flexibility to produce the optimal arc characteristics. Use the high stabilizer setting for stainless steel and low setting for mild steel and aluminum.

Solid-state weld contactor provides longevity to match the ultra-durable and reliable reputation of the CP series.

115 VAC duplex receptacle provides 15 amps of auxiliary power.

14-pin receptacle provides quick, direct connection to wire feeders and accessories.

Presetttable welding voltage with voltmeter allows you to easily set weld output before welding.

Large analog volt and ammeters for easy viewing.

Power efficient which gives exceptional value and return on your investment.

Simple control panel with just one control adjustment.

Lower panel cover protects output connections from harsh welding environments.

TRUE BLUE
